

# Health & Safety Monitoring Services

Cti environmental offers specialist services for all types of exposure monitoring in the workplace, along with risk assessment and reduction techniques to ensure that companies meet their obligations of employee safety. Cti also provide advice and assistance in implementing and maintaining H&S systems, selection of PPE and equipment for minimising exposure.

## Services include:

- **Monitoring and Measurement of Exposure**
- **Occupational Hygiene/COSHH Assessments**
  - Dust and fume, metals, silica
  - Toxic gases/vapours, fibres
  - Workplace noise exposure
  - Local exhaust ventilation (LEV) testing and examination
- **Hand-Arm Vibration Monitoring**
  - Initial risk assessment
  - HAV measurements
  - Risk reduction and management
  - Risk assessment training

All routine activities are accredited by UKAS
