

**QUALITY MANAGEMENT SYSTEM
PRODUCT SAFETY & CONFORMITY POLICY**

Castings Technology International produces parts for a wide range of customers with ranging levels of criticality.

Castings Technology International's commitment to product safety and conformity is a key characteristic of the organisation.

The goods delivered by the organisation are produced to high manufacturing standards to ensure product safety and conformity is maintained.

The principles that govern our approach to promote continual improvement towards product safety & conformity are:

- Leadership commitment and accountability
- High level of product safety
- Maintaining and improving product safety
- Safety awareness and competence
- Continuous improvement
- Investment in Staff & Equipment

It is the responsibility of all employees to report any issues that have the potential to affect product safety and/or conformity to a member of the senior management team. Any applicable parts shall be quarantined whilst an investigation will be undertaken.
